

Министерство образования Республики Беларусь  
Учреждение образования  
«Белорусский государственный университет  
информатики и радиоэлектроники»

Факультет информационных технологий и управления

Кафедра информационных технологий автоматизированных систем

**А. А. Навроцкий, А. Б. Гуринович**

**ОСНОВЫ АЛГОРИТМИЗАЦИИ  
И ПРОГРАММИРОВАНИЯ**

**ALGORITHMS AND DATA STRUCTURES**

*Допущено Министерством образования Республики Беларусь  
в качестве учебного пособия для иностранных студентов  
учреждений высшего образования по специальности  
«Автоматизированные системы обработки информации»*

Научная библиотека

ЛНТУ

## CONTENT

<b>THEORY PART</b> .....	6
<b>1. C++ language Basic Elements</b> .....	6
1.1. Identifiers .....	6
1.2. Keywords .....	6
1.3. Comments .....	6
1.4. Operation Symbols.....	7
1.5. C++ Program Structure .....	7
1.6. Preprocessor Directives .....	7
1.7. C++ Standard Libraries.....	8
1.8. The cmath Library.....	9
1.9. Formated Input/Otput of Data.....	11
1.10. Stream Input/Output.....	13
<b>2. Fundamental Data Types</b> .....	15
2.1. Data Types .....	15
2.2. Variables and Constants Declare .....	15
2.3. Integer Data Type .....	15
2.4. Character Data Type .....	16
2.5. Real Data Type.....	18
2.6. Boolean Data Type .....	18
2.7. Void Data Type.....	19
2.8. Declaration of auto.....	19
2.9. Mathematical Constants.....	19
2.10. Implicit Type Conversion .....	20
2.11. Explicit Type Conversion .....	20
<b>3. C++ Language Operations</b> .....	22
3.1. Arithmetic Operations.....	22
3.2. Assignment Operation .....	22
3.3. Relational and Comparison Operators.....	23
3.4. Logical Operations.....	23
3.5. Bitwise Operators.....	24
3.6. Priority of Operations in C++ .....	24
3.7. Blocks.....	26
<b>4. Branching Algorithms</b> .....	27
4.1. Conditional Transfer Control Operator if .....	27
4.2. Conditional Operation.....	28
4.3. Multiple Selection Operator switch .....	28
<b>5. Cyclic Algorithms</b> .....	31
5.1. Loop Operator for .....	31
5.2. Loop Operator while.....	32
5.3. Loop Operator do-while .....	33
5.4. Operators and Functions of the Control Transfer .....	33

5.5. Loop Algorithms .....	34
<b>6. Arrays</b> .....	37
6.1. One-dimensional Arrays .....	37
6.2. One-dimensional Arrays Operation Algorithms .....	38
6.3. Multidimensional Arrays .....	39
6.4. Two-dimensional Arrays Operation Algorithms .....	40
<b>7. Pointers</b> .....	43
7.1. Pointer Declaration .....	43
7.2. Operations over Pointers .....	43
7.3. Pointers Initialization .....	44
7.4. Dynamic Memory .....	45
7.5. One-dimensional Dynamic Array .....	45
7.6. Two-dimensional Dynamic Array .....	46
<b>8. Functions</b> .....	48
8.1. Function Concept .....	48
8.2. Parameter Passing .....	49
8.3. Functions Overload .....	53
8.4. Function Pointer .....	53
<b>9. String Variables</b> .....	56
9.1. Rows Declaration .....	56
9.2. Rows Functions .....	56
9.3. Operation Algorithms with Strings .....	60
<b>10. Users Data Types</b> .....	63
10.1. Structures Declaration and Implementation .....	63
10.2. Unions .....	66
10.3. Enumerations .....	67
<b>11. Files</b> .....	68
11.1. File Concept .....	68
11.2. Files Functions .....	68
<b>12. Visibility Area and Storage Classes</b> .....	76
<b>13. Recursive Algorithms</b> .....	77
13.1. Recursion Concept .....	77
13.2. Recursive Algorithm Termination Condition .....	78
13.3. Examples of Recursive Algorithms .....	78
13.4. Reasonability of Use Recursion .....	81
<b>14. Sorting Techniques</b> .....	82
14.1. Simple Sorting Methods .....	82
14.2. Improved Sorting Methods .....	84
<b>15. Search Algorithms</b> .....	89
15.1. Linear Search .....	89
15.2. Binary Search .....	89
15.3. Interpolation Search .....	90
<b>16. Dynamic Data Structures</b> .....	91
16.1. List, Stack and Queue Concept .....	91

16.2. Stack Implementation .....	91
16.3. Unidirectional Queue Implementation.....	94
16.4. Doubly Linked Lists Implementation .....	96
16.5. Doubly Linked Circular Lists Exercise .....	99
<b>17. Nonlinear Lists .....</b>	<b>100</b>
17.1. Tree Data Structures .....	100
17.2. Tree Structures Implementation.....	100
17.3. Binary Search Tree .....	102
<b>18. Parsing of Arithmetic Expressions (Syntactic Analysis).....</b>	<b>107</b>
18.1. Conversion Expression Algorithm to the RPN Form .....	107
<b>19. Hashing .....</b>	<b>111</b>
19.1. Hashing Concept.....	111
19.2. Hashing Schemes .....	112
19.3. Hash Table with Linear Addressing .....	112
19.4. Hash Table with Square and any Addressing .....	114
19.5. Hash Table with Double Hashing .....	114
19.6. Hash Table on the Linked Lists Basis .....	115
19.7. Blocks Method .....	117
<b>LABS .....</b>	<b>118</b>
1. Linear Algorithms Programming.....	118
2. Branching Algorithms Programming.....	121
3. Loop Algorithms Programming.....	123
4. One-dimensional Arrays Implementation.....	126
5. Two-dimensional Arrays Implementation .....	127
6. Functions Implementation .....	129
7. Strings Implementation .....	131
8. Structures' Implementation.....	133
9. Files Implementation .....	136
10. Recursion's Implementation .....	136
11. Arrays Sorting .....	138
12. Search by Key in One-dimensional Array .....	140
13. Stacks Implementation.....	141
14. Two-linked Lists Implementation.....	142
15. Tree Data Structures .....	143
16. Algebraic Expressions Calculation .....	144
17. Hashing Implementation .....	146
<b>APPLICATIONS .....</b>	<b>148</b>
1. Console Mode of the Visual C++ 6.0 Environment .....	148
2. Program Execution .....	149
3. Program Debugging .....	149
<b>REFERENCES.....</b>	<b>151</b>
