НАНОПРОЕКТИРОВАНИЕ, ТЕХНОЛОГИЯ, КОМПЬЮТЕРНОЕ МОДЕЛИРОВАНИЕ – NDTCS-2021

Тезисы докладов XIX Международного симпозиума
(Республика Беларусь, Минск, 28-29 октября 2021 года)

Book of abstracts of XIX International Workshop
(Republic of Belarus, Minsk, October 28-29, 2021)

Минск БГУИР 2021

CONTENTS

N. Krylova, E. Ovsyuk, A. Ivashkevich, V. Red'kov Maxwell electrodynamics in media, geometry effects on constitutive relations	8
A. Baran, V. Kudryashov Energy levels of electron in circular quantum dot in the presence of spin-orbit interactions	9
T. Sidorova, A. Danilyuk Tunneling and magnetoresistance in ferromagnet/wide-gap semiconductor/ferromagnet nanostructure	11
D. Ponkratov, E. Chudakov, A. Sotsky, V. Minkovich Computer simulation of modal characteristics of photonic crystalline fibers with a layered coating	13
O. Kulakovich Plasmonic enhancement of luminescence efficiency in light emitting structures	15
A. Kuraptsova, A. Danilyuk Charging properties of the silicon / zinc oxide nanoparticle heterostructure ...	16
L. Trotsiuk, A. Muravitskaya, O. Kulakovich, M. Artemyev, S. Gaponenko Emission enhancement of semiconductor nanocrystals by gold nanorods: a recipe	18
A. Felsharuk, D. Podryabinkin, A. Danilyuk Plasmon effects in a graphene nanostructure	20
H. Grushevskaya, G. Krylov Electrically confined graphene quantum dots: theoretical treatment	22
A. Ivashkevich, V. Red'kov, V. Kisel Electrodynamics, complex rotation group, media	23
A. Danilyuk, A. Trafimenko, S. Prischepa Low temperature magnetoresistance in silicon doped by antimony	25
M. Baranava, V. Stempitsky <i>Ab initio</i> study of exchange interactions in the magnetic systems based on $Cr_2Ge_2X_6$ ($X=S, Se, Te$)	27
T. Mikhailova, T. Myasoedova Investigation of the structure of manganese-doped silicon-carbon films obtained by electrochemical method	28
A. Baglov, L. Khoroshko Atom species energy dependence on magnetic configurations in the perovskite yttrium orthoferrite	30
H. Grushevskaya, A. Timoshchenko, I. Lipnevich Emergence of topological defects in a bilayer of multiwalled carbon nanotubes irradiated by gamma-rays	32
V. Volcheck, D. Hvazdouski, M. Baranava, V. Stempitsky Temperature dependence of the thermal conductivity of Wurtzite Aluminum Nitride, Gallium Nitride and Aluminum-Gallium Nitride	33
Moumita Pal, Reshmi Maity, Niladri Pratap Maity Silicon carbide membranes for microelectromechanical systems based CMUT with influence factors	35
N. Krylova, V. Red'kov KCC-invariants-based geometrization of a theory of electromagnetic and spinor fields on the background of the Schwarzschild spacetime	37
A. Bezrukova, O. Vlasova Information - statistical approach to inverse optical problem solution for 3D disperse systems with nano and micro particles	38
A. Basalaev, V. Kuz'michev, M. Panov, A. Petrov, O. Smirnov Modeling the fragmentation of 2,5-diketopiperazine ions	40
V. Murav'ev, V. Mishchenka <i>Ab-initio</i> simulation of hydrogenated graphene properties	42
D. Hvazdouski, V. Stempitsky First-principles calculation of electronic properties of monoelement 2D materials	43
A. Leonovich, Yu. Vybyli Spherical wave-type solution in Relativistic Theory of Gravitation	45
A. Ponyavina, K. Barbarchyk, A. Zamkovets, S. Tikhomirov Modeling of optical properties of hybrid metal-organic nanostructures	46
V. Zalessky, A. Konoiko, V. Kravchenko, A. Kuzmitskaya Minimizing the influence of temperature changes in the environment on the performance criteria of thermo-optical processor based on Fabri-Perot and Smith microresonator	48
P. Badikova, D. Zav'yalov, D. Zharikov Circular photovoltaic effect in an anisotropic graphene superlattice in the presence of a constant electric field	50
N. Demidovich, D. Zav'yalov, A. Polikarpova Development of a package for automating the pipeline processing of quantum-chemical calculations using GAMESS on a cluster with a slurm queuing system	52

N. Vorsin, A. Gladyshchuk, T. Kushner, N. Tarasiuk, S. Chugunov, M. Borushko Modeling AlGaIn p-i-n photodiodes	53
O. Romanov, Ya. Shtykov, I. Timoshchenko Photoacoustic effect in micro- and nanostructures: numerical simulations of lagrange equations	55
G. Kostrov, D. Zav'yalov Influence of supply voltage on the velocity of flight of domains in a Gunn diode .	56
I. Staroverov, R. Dzerzhinsky Analysis and prediction of the development of microprocessor characteristics	58
M. Mehrabova, N. Panahov, N. Hasanov <i>Ab Initio</i> calculations of electronic band structure of CdMnS semimagnetic semiconductors	59
D. Shimanovich, D. Tishkevich, A. Vorobjova, A. Trukhanov Effects of technological regimes and surface morphology on wettability properties of porous Al ₂ O ₃ coatings	60
P. Vyaznikov, I. Kotilevets Developing a Seq2Seq neural network using visual attention to transform mathematical expressions from images to LaTeX	61
V. Volcheck, I. Lovshenko, V. Stempitsky Design optimization of the Gallium Nitride heterostructure field-effect transistor with a graphene heat-removal system	63
A. Khinevich, A. Stsiapanau, A. Smirnov Machine learning methods for predict electrophysical properties of semiconductor materials for optoelectronic and energy storage devices	65
I. Lovshenko, A. Voronov, P. Roshchenko, R. Ternov, V. Stempitsky The proton flux influence on electrical characteristics of a dual-channel HEMT based on GaAs	66
D. Zavyalov, E. Sivashova, E. Denisov The effect of a high-frequency electromagnetic field on the breather-electric effect in a non-additive superlattice	68
D. Shimanovich, D. Tishkevich The comparative analysis of technological regimes for improving the electrical insulation strength of double-sided alumina bases with vias	70
A. Kupchishin, M. Niyazov, B. Taipova, D. Utepova, B. Tronin Study of the influence of temperature and load on the mechanical properties of unirradiated and irradiated plexiglass of different types in the flat straight bending test	71
N. Voronova, A. Kupchishin, A. Kupchishin, T. Shmygaleva Computer modeling of cascade probabilistic functions, energy spectra of PKA and concentration of vacancy clusters in materials irradiated with light ions	73
S. Miskiewicz, A. Komarov, F. Komarov, V. Yuvchenko, G. Zayats Simulation of radiation damage of the semiconductor devices	74
V. Kovtun-Kuszhel, M. Bachko, Ya. Drobatau The effect of the electromagnetic radiation wavelength on the near-field characteristics of finite-length dielectric cylinders	75
I. Vrublevsky, A. Tuchkovsky, N. Lushpa, Pham Gia Vu, Tran Dai Lam Effect of thermal treatment on the electrical and photovoltaic characteristics of methylammonium lead triiodide perovskite films	76
A. Rudnitsky, N. Poleschuk Study of photonic nanojets in the diffraction wave fields of complex-shape dielectric particles	78
S. Lazarouk, U. Dudzich, A. Klyutsky, A. Dolbik, V. Labunov Photosensitive properties of avalanche LEDs based on nanostructured silicon	79
L. Kushner, I. Kuzmar Non-stationary electrolysis for nickel nanocomposite plating	80
A. Poznyak, A. Kukhta Modification of anodic alumina by laser irradiation during anodizing	82
A. Kistanov, R. Botella, E. Korznikova, A. Smirnov, S. Zhuk Density functional theory-based study of Cu ₂ TiSnS ₄ and Cu ₂ VSnS ₄ for photovoltaic applications	84
S. Biran, D. Korotkevich, A. Korotkevich, K. Garifov, A. Dashkevich Influence of radiation expoure on the properties of dielectric layers based on anodic aluminum oxide	85
A. Hubarevich, Ya. Mukha, A. Smirnov Optical properties of thin metallic nano-patterned films for display applications	86
D. Bykouski, A. Charkovskij Development of the library for 3D modeling and computer-aided design of plated knitted fabrics	88
Dao Dinh Ha, V. R. Stempitsky Design and simulation of 3D magnetic field sensors with integrated magnetic concentrator	89

A. Golovach, N. Kovalchuk, M. Mikhailik, Y. Kukuts, L. Dronina, I. Komissarov, S. Prischepa Schottky barrier height and ideality factor of CVD graphene/n-Si heterojunction	91
Tran Van Trieu, I. Lovshenko, V. Sadchenko, V. Stempitsky Studying the influence of microbolometer structure and geometry on the parameters of infrared detectors	93
A. Belko, N. Babarika, I. Zeylikovich, A. Nikitin Modification of the RLA model for presenting a cluster system of a composite material with a fractal filler structure	95
E. Zhuravleva, L. Studenikina Forecasting the level of assimilation of mathematical knowledge as a stage in modeling the educational process of a university in a blended learning environment	97
I. Zeylikovich, A. Nikitin, A. Belko Integration of general physics experiments with mathematical simulation	98
I. Drozdov Time series analysis of water pollution data	100
A. Shatina, A. Cheshkova Delaunay variables in model problems of celestial mechanics and cosmodynamics	102
A. Fomchenko Comparison of hybrid approaches in classification using decision trees and neural networks	104
A. Verkner, A. Asanov Mathematical modeling of the dynamics of a four-point platform of a heavy-duty vehicle	105
V. Aristov, A. Stroganov, A. Yastrebov Mathematical simulation of the spatial spread of COVID-19 waves in Russia	106
Y. Hudak, D. Parfenov, A. Beskin, I. Dragileva Model of lossy layered systems	107
N. Lomov, A. Shelepin 3D cave model with sparse data	108
V. Sleptsov, A. Ablaeva Determination of quality indicators of controlled electric drives at the design stage by the method of circuit simulation	109
A. Shmeleva, I. Goldobin, E. Klimova, A. Moskvina, Y. Lygarev Machine learning methods for evaluating innovative projects	111
M. Beskhamelnov, N. Shmeleva, S. Shilkov, M. Lygarev Distance learning as an imperative for digitalization of education	113
V. Kulagin, A. Alexandrov Destruction processes in power plants as a practical example for the course of mathematical modeling	114
A. Kryuchkov, A. Korolkov Simulation of some security tasks for secure telecommunications using a quantum-computing simulator in one of the quantum programming languages	116
V. Skobtsov, N. Lapitskaja Software tool for evaluation of reliability and survivability of complex technical system bases on logical-probabilistic methodology	118
A. Asanov, E. Guryanova Representation of a transmission model with continuous power flow in state space	119
A. Markov, A. Paramonov Parameters of load testing models: approaches to estimation	122
R. Shatovkin, Y. Parshenkova, V. Filatov Effectiveness indicators of modeling the air situation	124
R. Shatovkin, A. Rusakov, B. Anufriev Methodology for assessing the effectiveness of modeling the air situation	126
R. Shatovkin, O. Trubienko, A. Khudyakov Analytical-simulation modeling of the air situation	128
V. Feodorov, S. Harlamov On the restoration of the blurred image of a moving object	130
