информатики и радиоэлектроники»

В. А. Вишняков

СПЕЦИАЛИЗИРОВАННЫЕ IoT-СЕТИ: МОДЕЛИ, СТРУКТУРЫ, АЛГОРИТМЫ, ПРОГРАММНО-АППАРАТНЫЕ СРЕДСТВА

SPECIALISED IoT SYSTEMS: MODELS, STRUCTURES, ALGORITHMS, HARDWARE, SOFTWARE TOOLS

Минск БГУИР 2023

CONTENT

ABBREVIATION 5
INTRODUCTION 7
1 ANALYSIS OF INTERNET OF THINGS NETWORKS, PLATFORMS AND DATABASES 9
1.1 Overview of the Internet of Things 9
1.2 Basic Principles of IoT 12
1.3 Interaction of IoT with Promising Infocommunication Technologies 15
1.4 Architecture of IoT Network 19
1.5 Common IoT Platforms 23
1.6 Google BigQuery Database 25
1.7 Rationale for Choosing MySQL DBMS 27
1.8 Analysis of Optimization Methods for IoT Network 28
1.9 IoT Hardware and Software Development Tools 35
1.10 Structure of Component Interaction and Models Access in IoT Networks 45
Conclusion on Chapter 1 51
References 53
2 MODEL, STRUCTURE AND DEVELOPMENT OF IoT NETWORK FOR PRODUCTION QUALITY MONITORING 59
2.1 Model and Structure of IoT Network for Product Quality Monitoring 59
2.2 The Structure of IoT Network Based on a Cloud Platform 64
2.3 The Algorithm of IoT Network for Product Quality Monitoring 67
2.4 Development of the Using Case and Class Diagrams 69
2.5 Simulation of Sensors on Smartphone 74
2.6 Smartphone and Cloud Platform Communication 79
2.7 Modeling of the IoT Network Based On a Cloud Platform 80
2.8 Software Product Testing 84
Conclusion on Chapter 2 89
References 90
3 MODEL, STRUCTURE AND DESIGN OF IoT NETWORK DATABASE 92
3.1 Rewire of Milk Analyzers in the IoT Network 92
3.2 Selection and Designing of the Structural Scheme of the Database 96
3.3 Design of Variant Development DB Diagrams 98
3.4 Class Diagrams of Database 101
3.5 Rationale for Choosing a Google Cloud IoT Cloud Platform 105
3.6 Data Processing on the Platform 107
3.7 Procedure for Transmitting Sensor Data 109
3.8 Programming of the Milk Indicators Database 112

3.9 Testing the IoT Database Based on a Cloud Platform....119
Conclusion on Chapter 3 123
References....124
4 MODEL, STRUCTURE, ALGORITHMS of IoT SYSTEM
FOR PROCESSING OF ENVIRONMENTAL SOUND INFORMATION 127
4.1 Basis of Distributed Multiagent System for Processing Sound
Information of en Environment 127
4.2 Model and Structure of Multiagent System for Sound Monitoring 133
4.3 Optimization of the Choice of IoT Network Protocol
for Monitoring Audio Information....135
4.4 Optimization of IoT Cloud Platform Choosing of IoT Network
for Monitoring Audio Information....140
4.5 Structure, Components of IoT Network Emulation
on the Amazon Platform 143
4.6 Connecting Devices (Sensors) to the IoT Platform 147
4.7 Emulating a Device on a Smartphone 150
4.8 Simulation of Sensors and Network Operation 153
4.9 Multiagent System for Monitoring Sound Information Using IoT 155
4.10 Testing of IoT Network Operation 161
4.11 Multiagent System for Automatic Sound Detecting
Based on Raspberry PI and Arduino....163
Conclusion on Chapter 4....166
References....167
5 VOICE DETECTION USING CONVOLUTIONAL NEURAL
NETWORK....173
5.1 Task Statement....173
5.2 Machine Leaning and Neural Network....174
5.3 Sound Processing and Cough Detection Methods....176
5.4 The Proposed Cough Detection System Based on CNN....179
Conclusion on Chapter 5 181
References....181
