## **TABLE OF CONTENT**

|                                                                           |     |
|---------------------------------------------------------------------------|-----|
| INTRODUCTION                                                              | 6   |
| CHAPTER 1. BASIC PRINCIPLES OF INTEGRATED RISK MANAGEMENT                 | 9   |
| A Brief History of Risk Management.                                       | 9   |
| Principles of risk management based on ISO 31000. Risk culture.           | 16  |
| Integration of risk management into an organization's processes           | 23  |
| Determination of types of risk.                                           | 24  |
| Chapter conclusion                                                        | 38  |
| Questions for self-assessment                                             | 39  |
| List of recommended sources                                               | 40  |
| CHAPTER 2. STRUCTURAL MODULES OF THE RISK MANAGEMENT SYSTEM               | 42  |
| Implementation of the risk management process                             | 42  |
| A brief overview of ISO 31010.                                            | 53  |
| Chapter conclusions                                                       | 58  |
| Questions for self-assessment                                             | 59  |
| List of recommended sources                                               | 60  |
| CHAPTER 3. PROJECT RISK MANAGEMENT                                        | 61  |
| Risk management planning. Risk identification. Qualitative risk analysis. | 61  |
| Conducting quantitative risk analysis.                                    | 73  |
| Risk response planning.                                                   | 81  |
| Implementation of risk response.                                          | 86  |
| Risk monitoring.                                                          | 88  |
| Chapter conclusions                                                       | 91  |
| Questions for self-assessment                                             | 92  |
| List of recommended sources                                               | 93  |
| CHAPTER 4. ENTERPRISE RISK MANAGEMENT                                     | 94  |
| Sources of risk. Risk management program.                                 | 94  |
| Risks in IT.                                                              | 103 |

|                                                                              |     |
|------------------------------------------------------------------------------|-----|
| Chapter conclusions                                                          | 117 |
| Questions for self-assessment                                                | 118 |
| List of recommended sources                                                  | 119 |
| PART 2. ASSET PROTECTION AND INSURANCE                                       | 120 |
| CHAPTER 5. IDENTIFICATION AND ANALYSIS OF CONTRACTUAL OBLIGATIONS RISKS      | 120 |
| Contractual risks                                                            | 120 |
| Identification of Contractual Risks                                          | 122 |
| Conclusion of an agreement.                                                  | 124 |
| Execution of the contract.                                                   | 137 |
| Sanctions measures.                                                          | 140 |
| Chapter conclusions                                                          | 147 |
| Counterparty Verification as Part of Contractual Risk Management             | 148 |
| Structure of the China Company Register                                      | 149 |
| Structure of company register in Belarus                                     | 151 |
| Industry-Specific Contractual Risks                                          | 152 |
| Dispute Resolution Mechanisms in Belarus and China                           | 155 |
| Contractual Risk Mitigation Strategies                                       | 156 |
| Impact of Economic and Political Factors on Contractual Risks                | 157 |
| Questions for self-assessment                                                | 158 |
| List of recommended sources                                                  | 159 |
| CHAPTER 6. INSURANCE IN GLOBAL FINANCIAL AND ECONOMIC SYSTEMS                | 161 |
| Insurance as a Primary Asset Protection Strategy                             | 169 |
| Reinsurance and Insurance-Linked Securities (ILS)                            | 170 |
| Case Studies on Global Applications of ILS and Reinsurance                   | 172 |
| Questions for self-assessment                                                | 174 |
| List of recommended sources                                                  | 175 |
| CHAPTER 7. ASSET PROTECTION STRATEGIES: INSURANCE AND ALTERNATIVE MECHANISMS | 176 |
| Introduction to Asset Protection                                             | 176 |

|                                                                                           |     |
|-------------------------------------------------------------------------------------------|-----|
| Case Study: Asset Protection Strategies in a Large-Scale Construction Project             | 179 |
| Case Study: Asset Protection Strategies for a Role-Playing Game (RPG) Development Project | 181 |
| Case Study: Asset Protection Strategies for Promotion Project X                           | 183 |
| Questions for self-assessment                                                             | 185 |
| List of recommended sources                                                               | 186 |
| CHAPTER 8. ASSESSING INSURANCE NEEDS AND CHOOSING INSURANCE COVERAGE                      | 187 |
| Mandatory and voluntary insurance                                                         | 188 |
| Evaluating Insurance Providers & Policies                                                 | 192 |
| Strategic Decision-Making in Insurance Selection                                          | 194 |
| Case Studies and Practical Applications                                                   | 194 |
| Actuarial calculations in insurance                                                       | 196 |
| Questions for self-assessment                                                             | 197 |
| List of recommended sources                                                               | 198 |
| WORKSHOPS                                                                                 | 199 |
| Workshop 1: Risk Identification and Assessment Workshop                                   | 199 |
| Workshop 2. Example of Monte Carlo simulation for project price changes                   | 206 |
| Workshop 3: Developing Risk Mitigation Strategies                                         | 212 |
| Workshop 4: Case Study Analysis of Risk Management in Real Projects                       | 220 |
| Workshop 5: Risk Response Planning and Monitoring                                         | 225 |
| Workshop 6: Scenario-based Risk Management Simulation                                     | 232 |
| Suggested additional materials for workshops                                              | 237 |
| CONCLUSIONS                                                                               | 238 |
